â€œOrganic gardening is  
more than simply avoiding  
synthetic pesticides and  
fertilizers. It is about  
observing natureâ€™s  
processes, and emulating  
them in your garden as best  
you can. And the most  
important way to do that is  
to understand the makeup  
of your soil and to give it  
what it needs. If anything  
could be called a  
â€˜ruleâ€™ in organic  
gardening, itâ€™s this: feed  
the soil, not the plant.â€•
